14 March 1958

MEMORANDUM FOR: Project Director

SUBJECT : Tracking of 355

1. Information received from L/C Geary on 13 March was that 355 had been tracked on the outbound leg from [REDACTED] by U. S. and [REDACTED] radars. He stated that his source at the [REDACTED] indicated they had tracked 355 quite accurately to include altitude. This flight was made without the trapeze which may be the reason it was tracked without difficulty.

2. This office is looking into this further and will advise you of any subsequent developments.

[REDACTED]
Colonel, USAF
Director of Operations
